This atlas provides detailed information on the human lymphatic system in the head, neck and chest regions as well as the extremities, with more than 400 photographs and radiographs, including micro and macro views of the morphology. Much of the content is presented for the first time, such as the individual differences in lymphatic distribution, especially in the head neck region; characteristics of the indirect precollecting lymph vessel in the scalp; the lymphatic ampulla and diverticulum; and the transparent lymph node. Providing insights into the lymphatic anatomy, the book is an essential resource for medical and science students as well as therapists, clinicians and researchers working in this field. "As much as Scalzi has the scientific creativity of a Michael Crichton, he also has the procedural chops of a Stephen J. Canell to craft a whodunit with buddy-cop charm and suspects aplenty—most of them in someone else's body." —USA Today John Scalzi returns with *Head On*, the standalone follow-up to the New York Times bestselling and critically acclaimed *Lock In*. Chilling near-future SF with the thrills of a gritty cop procedural, *Head On* brings Scalzi's trademark snappy dialogue and technological speculation to the future world of sports. *Hilketa* is a frenetic and violent pastime where players attack each other with swords and hammers. The main goal of the game: obtain your opponent's head and carry it through the goalposts. With flesh and bone bodies, a sport like this would be impossible. But all the players are "threeps," robot-like bodies controlled by people with Haden's Syndrome, so anything goes. No one gets hurt, but the brutality is real and the crowds love it. Until a star athlete drops dead on the playing field. Is it an accident or murder? FBI Agents and Haden-related crime investigators, Chris Shane and Leslie Vann, are called in to uncover the truth—and in doing so travel to the darker side of the fast-growing sport of *Hilketa*, where fortunes are made or lost, and where players and owners do whatever it takes to win, on and off the field. In 'The Song of Wandering Aengus' William Butler Yeats refers to the 'fire in the head' that characterises the visionary experience. Tom Cowan has pursued this theme in a lyrical cross-cultural exploration of shamanism and the Celtic imagin. Essays on great figures and important issues, advances and blind alleys—from trepanation to the discovery of grandmother cells—in the history of brain sciences. Neuroscientist Charles Gross has been interested in the history of his field since his days as an undergraduate. *A Hole in the Head* is the second collection of essays in which he illuminates the study of the brain with fascinating episodes from the past. This volume's tales range from the history of trepanation (drilling a hole in the skull) to neurosurgery as painted by Hieronymus Bosch to the discovery that bats navigate

using echolocation. The emphasis is on blind alleys and errors as well as triumphs and discoveries, with ancient practices connected to recent developments and controversies. Gross first reaches back into the beginnings of neuroscience, then takes up the interaction of art and neuroscience, exploring, among other things, Rembrandt's "Anatomy Lesson" paintings, and finally, examines discoveries by scientists whose work was scorned in their own time but proven correct in later eras. A neurologist explores the very real world of psychosomatic illness. Most of us accept the way our heart flutters when we set eyes on the one we secretly admire, or the sweat on our brow as we start the presentation we do not want to give. But few of us are fully aware of how dramatic our body's reactions to emotions can sometimes be. Take Pauline, who first became ill when she was fifteen. What seemed at first to be a urinary infection became joint pain, then food intolerances, then life-threatening appendicitis. And then one day, after a routine operation, Pauline lost all the strength in her legs. Shortly after that her convulsions started. But Pauline's tests are normal; her symptoms seem to have no physical cause whatsoever. Pauline may be an extreme case, but she is by no means alone. As many as a third of men and women visiting their GP have symptoms that are medically unexplained. In most, an emotional root is suspected and yet, when it comes to a diagnosis, this is the very last thing we want to hear, and the last thing doctors want to say. In *It's All in Your Head* consultant neurologist Dr Suzanne O'Sullivan takes us on a journey through the very real world of psychosomatic illness. She takes us from the extreme -- from paralysis, seizures and blindness -- to more everyday problems such as tiredness and pain. Meeting her patients, she encourages us to look deep inside the human condition. There we find the secrets we are all capable of keeping from ourselves, and our age-old failure to credit the intimate and extraordinary connection between mind and body.

Bottom current measurements were taken in the head of Monterey Submarine Canyon in a water depth of 130 meters (72 fathoms) utilizing an Ekman current meter placed 480 centimeters (15.7 feet) above the bottom. Currents were observed to follow the canyon axes, and flow was seaward (down-canyon) on the rising tide and coastward (up-canyon) on the falling tide. Current speed was sometimes fairly steady and other times variable. It ranged between 0 and 41 centimeters per second (0 to 0.8 knot) and had a median speed of 10 cm/sec (0.2 knot). The six hours centered around low tide generally had considerably stronger currents than the similar period of time centered around high tide. (Author).

As dazzling as the decade they dominated, The Beatles almost single-handedly created pop music as we know it. Today, their songs are cited as seminal influences by stars like Oasis, Blur and Kula Shaker. Eloquently giving voice to their time, The Beatles quite simply changed the world. Fully updated to include material from The Beatles Live at the BBC and the Anthology series, this acclaimed book goes back to the heart of The Beatles - their records. Drawing on a unique resource of knowledge and experience to 'read' their 241 tracks - chronologically from their first amateur efforts in 1957 to 'Real Love', their final 'reunion' recording in 1995 - Ian MacDonald has created an engrossing classic of popular criticism in which the extraordinary songs of The Beatles remain a central and continually surprising presence. Enter the strange and haunting world of Anna Kavan, author of mind-bending stories that blend science fiction and the author's own harrowing experiences with drug addiction, in this new collection of her best short stories. Anna Kavan is one of the great originals of twentieth-century fiction, comparable to Leonora Carrington and Jean Rhys, a writer whose stories explored the inner world of her imagination and plumbed the depths of her long addiction to heroin. This new selection of Kavan's stories gathers the best work from across the many decades of her career, including oblique and elegiac tales of breakdown and institutionalization from *Asylum Piece* (1940), moving evocations of wartime from *I Am Lazarus* (1945), fantastic and surrealist pieces from *A Bright Green Field* (1958), and stories of addiction from *Julia and the Bazooka* (1970). Kavan's turn to science fiction in her final novel, *Ice*, is reflected in her late stories, while "Starting a Career," about a mercenary dealer of state secrets, is published here for the first time. Kavan experimented throughout her writing career with results that are moving, funny, bizarre, poignant, often unsettling, always unique.

Machines in the Head offers American readers the first full overview of the work of a fearless and dazzling literary explorer. This discounted ebundle of the *Lock In Series*: includes: *Lock In*, *Head On*, *Unlocked* "This is the kind of thriller that Michael Crichton, Lincoln Child, and James Rollins do so well. Add John Scalzi to that list." --Douglas Preston A blazingly inventive near-future thriller series from the best-selling, Hugo Award-winning John Scalzi. Not too long from today, a new, highly contagious virus makes its way across the globe. Most who get sick experience nothing worse than flu, fever and headaches. But for the unlucky one percent -- and nearly five million souls in the United States alone -- the disease causes "Lock In": Victims fully awake and aware, but unable to move or respond to stimulus. The disease affects young, old, rich, poor, people of every color and creed. The world changes to meet the challenge. Assessment of the Beatles artistic achievement providing biographical, musical, and historical detail through a chronology of their songs. A debut collection of short fiction introduces a series of dysfunctional, oddly vulnerable male characters in such works as "The Order of the Arrow," about a psychotic Boy Scout; "Make Me," in which a troubled high-school teacher struggles with his attraction to a female student; and the title story, about a young man who gets into unexpected trouble with an older woman. The World in the Head collects the best of Robert Cummins' papers on mental representation and psychological explanation. Running through these papers are a pair of themes: that explaining the mind requires functional analysis, not subsumption under "psychological laws", and that the propositional attitudes—belief, desire, intention—and their interactions, while real, are not the key to understanding the mind at a fundamental level. Taking these ideas seriously puts considerable strain on standard conceptions of rationality and reasoning, on truth-conditional semantics, and on our interpretation of experimental evidence concerning cognitive development, learning and the evolution of mental traits and processes. The temptation to read the structure of mental states and their interactions off the structure of human language is powerful and seductive, but has created a widening gap between what most philosophers and social scientists take for granted about the mind, and the framework we need to make sense what an accelerating biology and neuroscience are telling us about brains. The challenge for the philosophy of mind is to devise a framework that accommodates these developments. This is the underlying motivation for the papers in this collection.

Ex-army musketry trainer, Jay Benson and his wife Lucy's dream of running a shooting school turns sour as the school heads towards certain closure. They need money - quickly, and a lot of it. At the eleventh hour Augusto Savanto, head of a vast corporation in Venezuela, walks into their lives with a proposition they can scarcely refuse - he will pay them \$50,000 to turn his son into an expert marksman, in nine days. Desperate for money they accept the challenge but find themselves in a deadly game of ruthless vendettas and vengeful murder. His mother calls him a worthless halfwit while his fellow drunks at the local bar ensure he's the butt of all their jokes. He spends his days whittling wood, counting pigeons and adding his own name to the list on the town war memorial. So how could Germain possibly anticipate what a casual encounter on a park bench with eighty-five-year old Margueritte might mean? In this touchingly comic tale of an unusual friendship, that first conversation opens a door into a world Germain has never imagined—the world of books and ideas—and gives both him and Margueritte the chance of a happiness they thought had passed them by. From the Trade Paperback edition. A 2017 LA Times Book Prize Finalist

A quirky story of love, mischief, and forgiveness from Brazil's foremost award-winning author for young readers, in her U.S. debut. Fourteen-year-old Samuel is newly orphaned and homeless in a small town in Brazil. He lives in a giant, hollow, concrete head of St. Anthony, the lingering evidence of the village's inept and failed attempt to build a monolith over a decade ago. He didn't know what it was when he crawled into it, seeking shelter during a storm, but since coming there, he hears beautiful singing, echoing like magic in the head twice a day. So he stays. Miraculously, he can also hear the private prayers and longings of the villagers. Feeling mischievous, Samuel begins to help answer these prayers, hoping that if he does, their noise will quiet down and he can listen to the beautiful singing in peace. Ironically, his miracles gain him so many fans that he starts to worry he will never fulfill his own true longing and find the source of the singing. Filled with beautiful turns of phrase and wonderfully quirky characters, *The Head of the Saint* is a riotous story of faith and magic that won't soon leave your thoughts. Introduces the types of learning disabilities children can suffer from, and discusses some ways of overcoming these conditions

NEW YORK TIMES BESTSELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE A.V. CLUB • Includes new interviews! From the writer and director of *Knocked Up* and the producer of *Freaks and Geeks* comes a collection of intimate, hilarious conversations with the biggest names in comedy from the past thirty years—including Mel Brooks, Jerry Seinfeld, Jon Stewart, Sarah Silverman, Harold Ramis, Seth Rogen, Chris Rock, and Lena Dunham. Before becoming one of the most successful filmmakers in Hollywood, Judd Apatow was the original comedy nerd. At fifteen, he took a job washing dishes in a local comedy club—just so he could watch endless stand-up for free. At sixteen, he was

hosting a show for his local high school radio station in Syosset, Long Island—a show that consisted of Q&As with his comedy heroes, from Garry Shandling to Jerry Seinfeld. They talked about their careers, the science of a good joke, and their dreams of future glory (turns out, Shandling was interested in having his own TV show one day and Steve Allen had already invented everything). Thirty years later, Apatow is still that same comedy nerd—and he’s still interviewing funny people about why they do what they do. Sick in the Head gathers Apatow’s most memorable and revealing conversations into one hilarious, wide-ranging, and incredibly candid collection that spans not only his career but his entire adult life. Here are the comedy legends who inspired and shaped him, from Mel Brooks to Steve Martin. Here are the contemporaries he grew up with in Hollywood, from Spike Jonze to Sarah Silverman. And here, finally, are the brightest stars in comedy today, many of whom Apatow has been fortunate to work with, from Seth Rogen to Amy Schumer. And along the way, something kind of magical happens: What started as a lifetime’s worth of conversations about comedy becomes something else entirely. It becomes an exploration of creativity, ambition, neediness, generosity, spirituality, and the joy that comes from making people laugh. Loaded with the kind of back-of-the-club stories that comics tell one another when no one else is watching, this fascinating, personal (and borderline-obsessive) book is Judd Apatow’s gift to comedy nerds everywhere. Praise for Sick in the Head “I can’t stop reading it. . . . I don’t want this book to end.”—Jimmy Fallon “An essential for any comedy geek.”—Entertainment Weekly “Fascinating . . . a collection of interviews with many of the great figures of comedy in the latter half of the twentieth century.”—The Washington Post “Open this book anywhere, and you’re bound to find some interesting nugget from someone who has had you in stitches many, many times.”—Janet Maslin, The New York Times “An amazing read, full of insights and connections both creative and interpersonal.”—The New Yorker “Fascinating and revelatory.”—Chicago Tribune “Anyone even remotely interested in comedy or humanity should own this book.”—Will Ferrell A collection of essays on the joys of great literature from the New York Times–bestselling author and winner of the National Book Critics Circle Award. One of America’s foremost novelists and critics, Cynthia Ozick has won praise and provoked debate for taking on challenging literary, historical, and moral issues. Her new collection of spirited essays focuses on the essential joys of great literature, with particular emphasis on the novel. With razor-sharp wit and an inspiring joie de vivre, she investigates unexpected byways in the works of Leo Tolstoy, Saul Bellow, Helen Keller, Isaac Babel, Sylvia Plath, Susan Sontag, and others. In a posthumous and hilariously harassing “(Unfortunate) Interview with Henry James,” Ozick’s hero is shocked by a lady reporter. In “Highbrow Blues,” and in reflections on her own early fiction, she writes intimately of “the din in our heads, that relentless inner hum,” and the curative power of literary imagination. The Din in the Head is sure to please fans of Ozick, win her new readers, and excite critical controversy and acclaim. “Open the collection anywhere—I guarantee it—and you will feel the bite of her distinctive voice.” —Sven Birkerts, Los Angeles Times “The passion that fills these essays is invigorating. In our age of irony and commercial pandering, we need writers like Ozick.” —Danielle Chapman, Chicago Tribune Following twenty years of close friendship with author Wilbert Smith, Vertus Hardiman reveals the truth about his horrifying experience hidden since age five. His life is a moving example of humility, success, and achievement while enduring long standing suffering. The story tells of Vertus Hardiman and nine other children, each attending the same elementary school in Lyles Station Indiana—who, in 1927, was severely irradiated during a medical experiment conducted at the local county hospital. The experiment was misrepresented as a newly developed cure for the scalp fungus known as ringworm. But in reality, the ringworm fungus was merely the lure used to gain access to children whose unsuspecting parents blindly signed permission slips for the treatment. Vertus was age five and the youngest. As remarkable and shocking as the story may appear, it is not an indictment on inhumane government-sanctioned medical experimentation. Rather, Hole in the Head: a Life Revealed reflects the incredible strength of one man who survived the harshest imaginable circumstances through the power of who and what he was determined to become. His simplicity and life philosophy always lifted the spirits of those he touched. Remarkably, not one person in Vertus's community was aware of his suffering because he always wore a wig or woolen beanie cap to hide his shame. He stated, "For over seventy-one years, only four individuals outside a few medical specialists have ever seen my condition. I hide it because I look like some monster." But in reality, Vertus was the kindest example of human love Wilbert had ever met—always choosing love over hate and success over excuses and failure. This incredible story inspires us to change our outlook on life, while teaching the true meaning of love, forgiveness, and acceptance. Journey with us through this rich and unforgettable story A dazzling work of personal travelogue and cultural criticism that ranges from the primitive to the postmodern in a quest for the promise and meaning of the psychedelic experience. While psychedelics of all sorts are demonized in America today, the visionary compounds found in plants are the spiritual sacraments of tribal cultures around the world. From the iboga of the Bwiti in Gabon, to the Mazatecs of Mexico, these plants are sacred because they awaken the mind to other levels of awareness—to a holographic vision of the universe. Breaking Open the Head is a passionate, multilayered, and sometimes rashly personal inquiry into this deep division. On one level, Daniel Pinchbeck tells the story of the encounters between the modern consciousness of the West and these sacramental substances, including such thinkers as Allen Ginsberg, Antonin Artaud, Walter Benjamin, and Terence McKenna, and a new underground of present-day ethnobotanists, chemists, psychonauts, and philosophers. It is also a scrupulous recording of the author's wide-ranging investigation with these outlaw compounds, including a thirty-hour tribal initiation in West Africa; an all-night encounter with the master shamans of the South American rain forest; and a report from a psychedelic utopia in the Black Rock Desert that is the Burning Man Festival. Breaking Open the Head is brave participatory journalism at its best, a vivid account of psychic and intellectual experiences that opened doors in the wall of Western rationalism and completed Daniel Pinchbeck's personal transformation from a jaded Manhattan journalist to shamanic initiate and grateful citizen of the cosmos. He got sucker-punched, blindsided with something that only happens to other people. Actor David Shannon had a brain tumor. It was called an Acoustic Neuroma. In late 2007, he had surgery to have it removed. All should have gone well. It didn't. Gradually over the next two years, Shannon made one disturbing discovery after another that left his acting career and his former life in ruin. Hell in the Head is his story. With a knack for story-telling, Shannon takes us along on his medical misadventure with irreverent wit. As he weaves his way through his newly found post-surgery world, he shares heart-rending losses and his dashed hopes for recovery as well as stories of achievement and inspiration. From learning the bitter truth to running a half marathon to meeting Crookedsmile and others facing the same ordeal, Shannon tells the good and the ugly with the same wry humor that will have you laughing and crying at the same time. In the end, after a three-year-ride on a rollercoaster of emotional chaos, he presents an advocacy for improved care and counseling for Acoustic Neuroma patients. Hell in the Head is a story of wit and inspiration for all readers and a must read for Acoustic Neuroma patients and "posties." Forget shamrocks and leprechauns—the Ireland of Mike McCormack's imagination is a hellish stew of ax-murderers, self-mutilators, and homicidal toddlers. And these are the humorous stories. The 16 stories Getting It in the Head comprises are by turns grisly, sinister, macabre, and occasionally sacrilegious. In this popular text Joel Spring provocatively analyzes the ideas of traditional and non-traditional philosophies from Confucianism to human rights regarding the contribution of education to the creation of a democratic society. The goal is to explore how governments use education to control and manage their populations, and to examine forms of education that claim to free people from authoritarian control. Wheels in the Head, a critically original work now in its third edition, is widely used as a text for courses on philosophical, social, political, and historical foundations of education, and critical issues in education. Reflecting its global relevance, a Chinese translation of the second edition was published in 2005. NEW TO THIS EDITION: Expanded analysis of the use of education by authoritarian states Revisions to more clearly relate educational ideas to the theme of "wheels in the head" – a phrase coined by philosopher Max Stirner to describe the use of schools by modern governments to control their citizens. New sections on liberation education and on human rights education Celebrate the 26th anniversary of the Dogfish Head Craft Brewery with this rich, adventurous history The Dogfish Head Book: 26 Years of Off-Centered Adventures celebrates a quarter-century in business for the Dogfish Head Craft Brewery. history of the Dogfish Head Brewery and Distillery Explores the founders' unique and successful business philosophy Reveals new details about the future of this fast-growing brewery Celebrates the 26th anniversary of Dogfish Head Paired nicely with any Dogfish Head beer, *The Dogfish Head Book: 26 Years of Off-Centered Adventures* is a living guide to business and life—the Dogfish way! **NEW YORK TIMES BESTSELLER** • An all-new collection of honest, hilarious, and enlightening conversations with some of the most exciting names in comedy—from lifelong comedy nerd Judd Apatow. “When I need to read an interview with a comedian while in the bathroom, I always turn to Judd Apatow for deeply personal insights into the comedic mind. Place one on your toilet today.”—Amy Schumer No one knows comedy like Judd Apatow. From interviewing the biggest comics of the day for his high school radio show to performing stand-up in L.A. dive bars with his roommate Adam Sandler, to writing and directing *Knocked Up* and producing *Freaks and Geeks*, Apatow has always lived, breathed, and dreamed comedy. In this all-new collection of interviews, the follow-up to the New York Times bestselling *Sick in the Head*, Apatow sits down with comedy legends such as David Letterman, Whoopi Goldberg, and Will Ferrell, as well as the writers and performers who are pushing comedy to the limits, and defining a new era of laughter: John Mulaney, Hannah Gadsby, Bowen Yang, Amber Ruffin, Pete Davidson, and others. In intimate and hilariously honest conversations, they discuss what got them into comedy, and what—despite personal and national traumas—keeps them going. Together, they talk about staying up too late to watch late-night comedy, what kind of nerds they were high school, and the right amount of delusional self-confidence one needs to “make it” in the industry. Like eavesdropping on lifelong friends, these pages expose the existential questions that plague even the funniest and most talented among us: Why make people laugh while the world is in crisis? What ugly, uncomfortable truths about our society—and ourselves—can comedy reveal? Along the way, these comics reminisce about those who helped them on their journey—from early success through failure and rejection, and back again—even as they look ahead to the future of comedy and Hollywood in a hyper-connected, overstimulated world. With his trademark insight, curiosity, and irrepressible sense of humor, Apatow explores the nature of creativity, professional ambition, and vulnerability in an ever-evolving cultural landscape, and how our favorite comics are able to keep us laughing along the way. Examines the various features of the body associated with the head, particularly the brain and how it functions. 'Cone Beam CT of the Head and Neck' presents normal anatomy of the head using photographs of cadavers and CBCT images in sagittal, axial and coronal planes with the anatomic structures and landmarks clearly labelled. Important structures and regions are presented in detailed view. The photographs of human tissue (based on slicing of cadaveric heads) combined with CBCT images have not been used previously for an atlas of anatomy. Scanned objects with the possibility of 3D reconstruction present better understanding of the anatomy. A collection of comics by Rick Kirkman in which Wanda and Darryl MacPherson face the challenges and joys associated with raising young children.
